ecotainer™

ecotainer™ packaging is a revolutionary new product line that provides a more environmentally sensitive alternative to traditional disposables. Sourced from **fully renewable resources** these cups and containers use a corn based plastic instead of a petrochemical plastic lining. These products are **BPI Certified Compostable** in municipal and commercial composting facilities. Combined with a smaller manufacturing energy requirement, ecotainer™ packaging **reduces our environmental impact** while providing all the functionality of traditional packaging.
